

Andris Rožkalns

Junior DevOps & Linux Engineer

Dortmund, Germany andris@rozkalns.net github.com/rozkalnsandris rozkalns.net Available from January 2027

ABOUT

I'm based in Dortmund and have learned Linux and DevOps through self-study. After a long career in logistics, I'm deliberately returning to IT. I first gained hands-on experience at school by administering Linux game servers over SSH/FTP, maintaining PHP forums and building HTML websites.

Today I design, automate and operate a self-hosted Raspberry Pi 5 environment running 24/7 with Docker, monitoring, DNS and AI services. I am looking for a Junior DevOps or Linux Systems Administrator role and am available from January 2027.

EXPERIENCE

Warehouse Employee · Sonepar Deutschland · Dortmund - High-volume electrical wholesale order processing with scanner systems. - Cable preparation, forklift operation and rotating-shift logistics.	Jul 2023 – Dec 2026 planned
