

Andris Rožkalns

Junior DevOps & Linux Engineer

44319 Dortmund, Germany · +49 176 8513 4770 · andris@rozkalns.net
github.com/rozkalnsandris · rozkalns.net · Available from January 2027 · Remote-friendly

SUMMARY

Self-taught **Linux & DevOps** engineer returning to IT after a 14-year logistics career. I design, deploy and operate a production homelab on a Raspberry Pi 5 — **containerized** workloads across **12+ Docker services 24/7 at 100% uptime over 30 days**, with full **monitoring & alerting** and **Infrastructure-as-Code** practices. This CV is served live from that stack. Seeking a Junior **DevOps / Linux Systems Administrator** role, ideally remote.

EXPERIENCE

Warehouse Employee · Sonepar Deutschland Jul 2023 – Dec 2026
Region West · Dortmund, Germany

- Processed high-volume electrical wholesale orders using scanner systems; cable preparation and forklift operation across rotating shifts
- Built strong process discipline, reliability and systematic troubleshooting — directly transferable to IT operations, incident response and on-call work

Painting Area Manager · SIA “Koksne” May 2020 – Jun 2023

- Managed daily production and warehouse operations, staff tasks and workflow; airless spray painting to a zero-defect standard

Warehouse / Shop Manager · SIA “Apavu Bode” Aug 2011 – Apr 2020

- Ran all warehouse operations: cargo receiving, stock organisation, staff coordination and day-to-day workflow

Early IT — Self-taught · Secondary school ~2008 – 2011

- Handled Linux server administration for Counter-Strike 1.6 game servers via SSH/FTP, modified IPB forums (PHP) and built HTML websites — first hands-on Linux & server experience

KEY PROJECTS — HOMELAB

Production Linux Server Stack & Monitoring

- Raspberry Pi 5 + NVMe running **12+ containerized services (Docker Compose) 24/7** behind an Nginx reverse proxy, AdGuard DNS, wildcard SSL/TLS and Cloudflare Tunnel
- Prometheus + Grafana **monitoring & alerting** (30-day retention) — live metrics power the stats on rozkalns.net

Hermes — Self-hosted AI Agent

- Production AI agent with primary/fallback **LLM routing**, ChromaDB vector search and persistent memory; Telegram interface, Home Assistant integration, systemd-managed gateway

Home Automation & Automated Maintenance

- Matter-based Home Assistant setup; automated **CI/CD-style** update pipeline (weekly APT + Docker) with Telegram reporting and healthchecks.io dead-man's switch

SKILLS

Core	Linux · Docker · Docker Compose · CI/CD · Bash scripting · Nginx · DNS · SSL/TLS · Prometheus · Grafana · systemd · Git
Working with	Python · REST APIs · Home Assistant · ESP32 / IoT · YAML · SQLite
Learning	Ansible · Terraform · AWS (Cloud)
Foundations	Networking · SSH/FTP · PHP · HTML / CSS

EDUCATION

The Linux Command Line (TLCL)
Self-study · chapters 1–13 · applied daily · ongoing

Multimedia Communication
Rīga Stradiņš University · 2011–2013 · partial

Secondary Education
Riga 45th Secondary School · 2004–2011

LANGUAGES

Latvian — Native

English — Fluent

German — B1
